

**Performance attributes for The Actor-and-Puppet Theatre ‘Gong’
production ‘Vagabonds of the North’.**

Light aluminium construction 4×10×8 m. serving as a framework and assembled without using a single nail is assembled and disassembled with 1,5 hours’ time.

Drop-curtain is necessary.

Sound: 3 kW, speakers are active.

Light: power of dimmers is 20 kW; projectors are mounted on the constructions, that is why a light ‘gun’ in the hall is all that is needed. It is necessary to coordinate the communication point of our dimmers with your power-generating sets, i.e. what connector is needed?

Any theatre hall with up to 500 - 1000 seats would do.

Tickets for balkony and boxes seats are a welcome option.

and non-technical....

Guaranty cost of the performance is ... Euro.

For the tour to take place, the schedule should include at least....performances in...days.

Senators, sponsors, mayors, governors (as the tour quarantors) are absolutely necessary.

Schedule of the tour, its route, the company’s meals and accomodation, cost per day, rent and transportation cost and the like are subject to discussion.

A journey is a test, the performance gives one a sense of meaningfulness, brings about change, helps to make new friends, and get new impressions, but it is a **work** and as such should **be rewarded**.
